Women's Major Group Rio+20 Side Event Women's Resistance and Resilience

9:30 - 11:00 am, Friday 15 June 2012 ; Pavilion T, Room 10, Rio Centro, Rio de Janeiro

Social equity, gender equality and environmental justice must form the heart of sustainable development, and of the outcomes of the Rio+20 UN conference. Twenty years after the first Rio conference, great social and economic inequities still remain. These inequities especially affect women and children, who make up the majority of those living in poverty. The women's major group supports the transformation from the current economic system to a sustainable and equitable economic system, which ensures gender equality, human rights and environmental justice and supports sustainable livelihoods and poverty eradication.

This side event will present testimonies from women resisting extractive industries, unsustainable energy, agro-fuels and land-grabbing attempts. The side event will also show examples of women's initiatives towards sustainable and equitable economies followed by an interactive discussion on lessons for international cooperation and national and local action.
